

TAC “UKRINVESTTECH” LTD.
Corporation “IPM Group”

TAC "Ukrinvesttech" Ltd. within the bounds of corporation "IPM Group" provides **coordination, management and legal support** of complex projects and also legal support of foreign trade activities of corporation.

Company "AViSat" assign a specialization to **systems of technical safety, systems of management** of engineering systems and networks of buildings, industrial objects. "AViSat" is the major supplier, manufacturer, developer and installer of these systems.

Company BK specializes in area of hi-tech systems of fire safety and fire automatics. Company has large number of qualified specialists, own design department, electrical laboratory and manufacturing facilities.

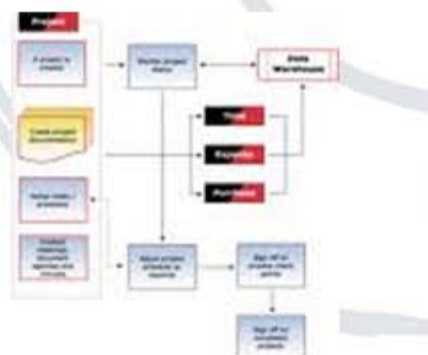

Company "TechnoCobalt" provides physical protection of objects of various degree of importance. Company created inter-regional panel of the centralized physical protection with the round-the-clock reaction of mobile groups.

Project management

Our company successfully provides full complex of works:

- consulting services and elaboration of feasibility studies on implementing of technological innovations
- designing works and endorsement of projects
- permitting works for construction and commissioning
- supply of equipment including equipment of twofold purposes with concordance with Export Control Service
- starting-up works, servicing, warranty and after-sale maintenance

Our company has successful experience of project implementation on construction of surveillance tower systems of state borders of Ukraine. System includes designing and construction of towers of 40-50 m., with installation on them monitoring and surveillance systems, equipping of command centers and also following:

- alarm security systems, video surveillance and access control systems
- perimeter security systems
- fire alarm systems and fire suppression systems
- data transfer systems
- remote control of alarm and access control systems
- remote control of diesel-generator equipment

**Surveillance tower system
at Ukraine-Moldova state border**

Vehicle based surveillance systems

Companies of corporation implemented projects of surveillance systems deployment basing on vehicles for law-enforcement agencies:

- data transfer systems
- spectrum analyzers, scanning receivers, direction finders
- high-resolution video surveillance systems
- audio- and video data registration systems
- monitoring posts of cellular communications
- uninterruptable power supply systems, life-support systems

Vehicle based surveillance systems

Vehicle base IVECO Turbo Daily

Broadband meter and
microwave antennas

Spectrum analyzer
Scanning receivers
Direction finders

Surveillance systems

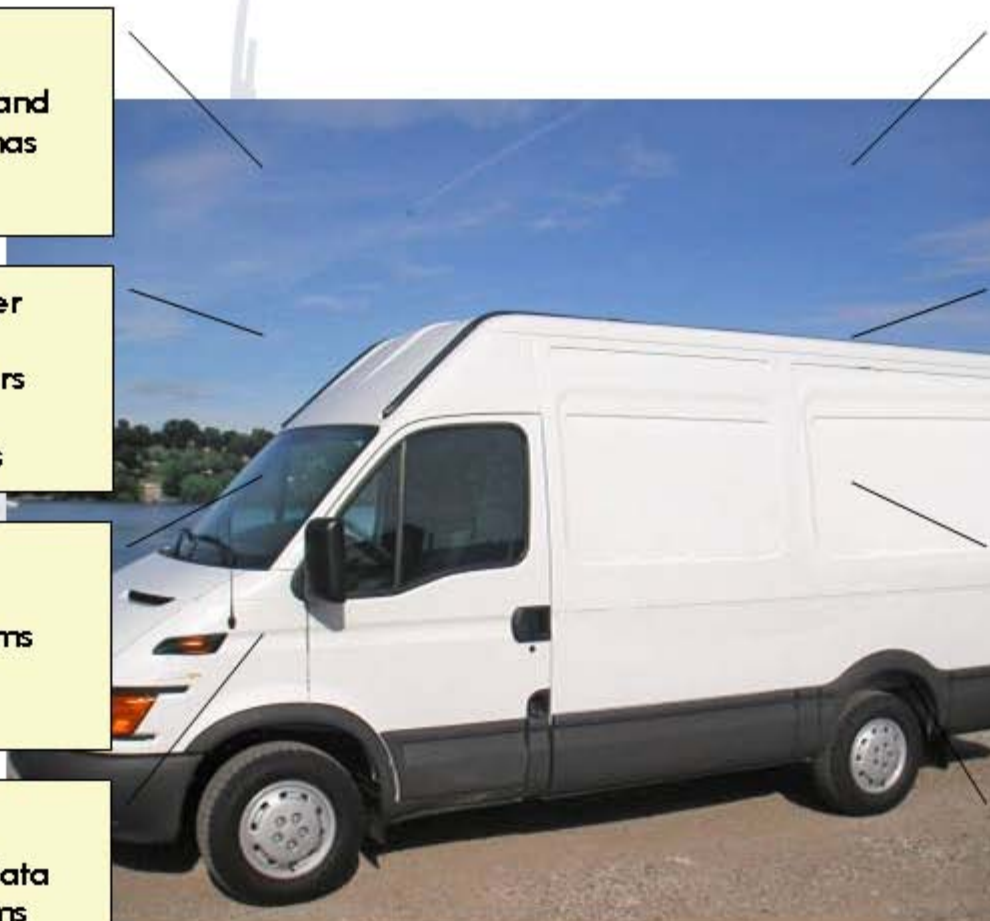

Audio- and video data
registration systems

Monitoring posts of cellular
communications

Control system of scanning
antennas and
videocameras

Uninterruptable power
supply systems

Life support system –
ventilation, conditioning,
heating

Procurement of high-tech equipment for law-enforcement agencies

American Technologies Network Corp.

- Night vision devices, day optics (monoculars, binoculars, day/night weapon sights etc.)
- Thermal night vision (binoculars, thermal weapon sights etc.)

FLIR

- Thermal imaging (government systems, commercial vision systems, thermography)

NIKIRET

- Detectors (seismic, vibration, wire-wave etc.)
- Alarm systems & complexes for tactical forces

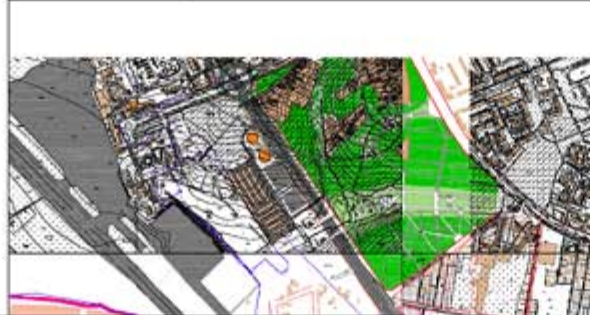

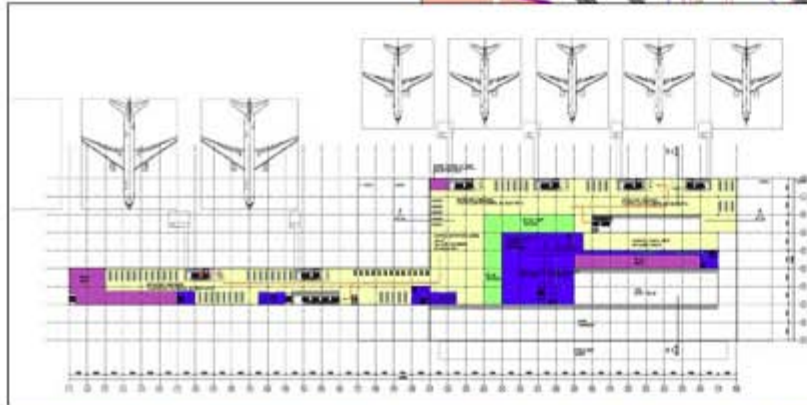

Specialists of corporation “**IPM Group**” developed complex project of dispatching system of Lvov international airport for **EURO-2012**

- building management systems
- structured cable system and telephony
- surveillance system and access control system
- multimedia video and informational systems
- common-timing system
- flight data display system
- insonation system of airport buildings

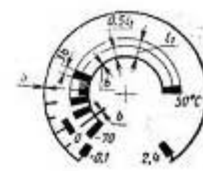

- fire alarm system
- fire warning system
- internal and external water supply system
- fire-resisting treatment of building constructions
- automatic systems of water-, gas- and powder fire extinguishing systems

Complex project of dispatching system of Lvov international airport

[illegible]

Design departments of corporation developed projects of perimetral alarm system of NPP in Ukraine and CIS according to **GOSTs 34.xxx**

- formation of requirements, elaboration of system concept
- working out of statement of works on system
- working out of outline sketches, technical design
- elaboration of work and executive documentation
- commissioning, starting-up and adjustment works
- support of automated control system
- training and support of users

Perimetral alarm system of NPP in Ukraine and CIS

- Thermal vision alarm systems
- Electromechanical alarm systems
- Vibration alarm systems (triboelectric, fiber-optic etc.)
- Radio beam alarm systems
- Magnetometric alarm systems
- Optical alarm systems

Armyansk NPP

Rivne NPP

Khmelnytsky NPP

Warranty and after-sale servicing

Corporation has authorized centers for guarantee and after-sale service of the equipment imported to Ukraine. Our centers provide servicing in **"hot line" mode**.

Thank you for your attention!
